

## TRAINING ORGANIZATION EDITION

Cloud-based, automatic, self-service  
and integrated environment for  
training organization that need to  
launch multiple environments  
quickly

### Self Service

Self Service environment with no need for infrastructure handling.

### Automatic

Automated environment with no human intervention.

### CI Support

Supports CI for automated testing.

### Fast, Reliable

Run an environment in 15 minutes.

### On / Off

Goes on and off automatically whenever, anywhere. You decide.

### SOFTWARE DEPLOYED TO-ORDER, WHEN YOU NEED IT, WHEREVER YOU NEED IT. FAST.

Automat-IT EaaS - Environment as a Service solution allows you to run environments for whatever technology you teach reliably, quickly and at a fraction of the cost. We provide an environment that amplifies your organization's creativity and eliminates IT complexity.

Automat-IT EaaS was created leveraging years of experience in the most complex IT organizations, managing DevOps for the most advanced training organizations, and working with educators, students, developers, system engineers, architects and executives across industries to bring a holistic, self service, automatic, quick and reliable environment that works for every stakeholder, on time and on budget.

"Automat-IT EaaS Environment as a Service enables us to launch automatically tens of learning environments in zero time. It revolutionized how we offer courses, how we educate on-prem, in-class and online and how we engage with our students to provide education at speed about working on the latest technologies and tools. We are now offering programs that were just not feasible before we started using Automat-IT EaaS and our teachers and students clearly make the most of it "

**Lidor Gerstel, Head of DevOps Seminars and DevOps Expert, John Bryce Training**

**JOHN BRYCE**  
Leading in IT Education

"IT environments are becoming increasingly complex as applications become distributed, multi-cloud and accessible across a variety of different endpoints, IoT, mobile, etc. Replicating and managing environments is an issue as organizations scale."

**2018: The Year Of Enterprise DevOps, Forrester**

**FORRESTER**

## SUPPORTS KUBERNETES CLUSTER ON ALL CLOUDS, OPENSIFT, DOCKER ENTERPRISE, VMWARE, AWS, EC2, AZURE, GOOGLE CLOUD AND OTHERS.

**Time to Market** EaaS allows you to launch multiple courses fast and teach what's coming next.

**On time** It takes 15 minutes or less to launch the whole class automatically. No need to show up extra early.

**Self Service** No need to look for 'the IT guy', just switch it on, and...the environment is on!

**Scale** Whether it is a private lesson, a classroom or a multi site endeavor, EaaS facilitates a learning environment that grows with you automatically.

**Flexible** Joining or removing students is one teacher keystroke away.

**Production Env. 'Train hard - fight easy'.** EaaS allows to simulate a production environment and offer a true real life experience to your students.

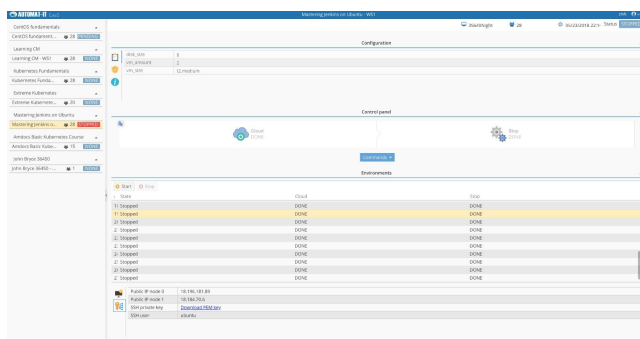

**On or off-site** With EaaS the whole world turns into your education center. just connect to it and you are up and running.

**Ready for what you teach today, and in the future** You need an environment that supports private and public clouds as well as hybrid, Dockers, Kubernetes and Microservices Architecture, and yet be adaptive to changes and ready for future developments. EaaS is present and future ready.

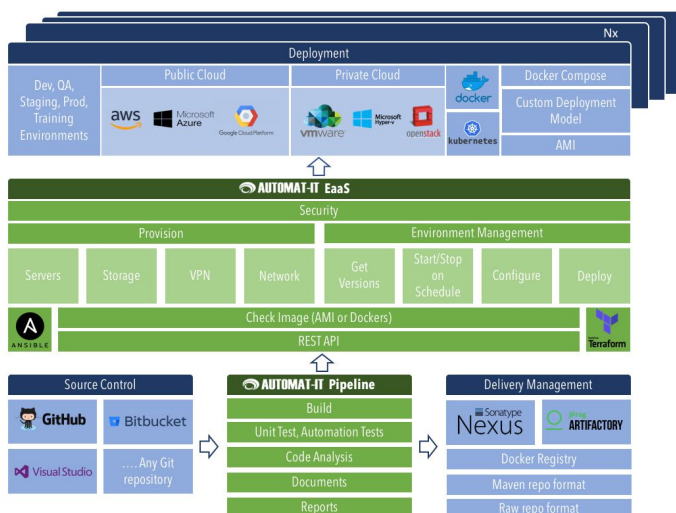

**Security** Make sure students don't put your organization at risk, with an environment that is secure and reliable.

**Build vs. Buy** While building environments for companies of all shapes and sizes, we discovered that we could bring value by creating an off the shelf EaaS solution. There is no reason to build your own. It's cheaper, faster to deploy, classroom ready, has all the bells and whistles and supported APIs, and it is not part of your core competency as an education center.
